PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience building applications using Python, FastAPI, Flask, LangChain, TensorFlow, React, and LLM frameworks. Skilled in developing RAG systems, local LLM deployments, multimodal AI solutions, REST APIs, and automation. Seeking an entry-level role in AI engineering or software development to apply these skills and keep growing.

TECHNICAL SKILLS

AI / ML: Generative AI, RAG, LLMs, NLP, Computer Vision, Machine Learning, Prompt Engineering, LLM Evaluation
Frameworks: LangChain, Hugging Face, Groq, TensorFlow, Scikit-learn, OpenCV
Programming & Web: Python, JavaScript, FastAPI, Flask, REST APIs, React.js, Streamlit
Data / Databases: Pandas, NumPy, BeautifulSoup, Scrapy, ETL, Power BI, PostgreSQL, MongoDB, Pinecone, MySQL
Cloud / DevOps: AWS (EC2), Vercel, Netlify, Azure AI Services, Docker, GitHub

PROFESSIONAL EXPERIENCE

AI/ML Intern | Appcrates | Gujranwala — Oct 2026 – Present

Python, Flask, MySQL, Groq API, Web Scraping, Gunicorn, Nginx, Linux, edge-tts, Multi-Tenant Architecture

- Built a Flask LinkedIn job scraper with live filtering by tech stack, country, location, and experience; auto-splits searches to bypass the 1,000-result cap, with stop/resume and Excel export.
- Implemented fake-job detection and automated CEO/CTO/HR contact lookup for every scraped job.
- Developed an ATS-friendly CV generator that tailors CVs to each job description and experience level.
- Built an interview-prep module using the Groq API with three modes (questions, Q&A, AI-graded practice) covering MCQs, technical, and coding challenges, with feedback reports.
- Developed a module for emails, WhatsApp, and voice messages (edge-tts), with sent history and resend tracking.
- Designed a multi-tenant platform with admin, company, and individual roles, a shared package catalogue with per-feature quotas enforced on every action, and strict data isolation.
- Deployed to a Linux server with Gunicorn, Nginx, and systemd (Git-webhook auto-deploy); added CSRF protection, rate limiting, encrypted email credentials, and a pytest suite.

Visa Consultant | Nujoom Al Falak Travel & Tourism | Gujranwala — Sep 2026 – Oct 2026

- Processed visa applications for GCC, Pakistani, and Indian clients and resolved their visa-related queries.
- Provided accurate travel information and guidance to support clients' visa and travel needs.

Data Scraping Trainee | Programmers Force | Remote — Jul 2025 – Feb 2026

- Scraped and processed data from 2,000+ websites across 30+ countries using a custom Chrome extension and CSS/HTML selectors.
- Built entity-filtering pipelines to keep verified person records; performed QA, preprocessing, and error reporting for failed scrapes.

Full Stack Developer | Freelance | Remote — Oct 2025 – Present

- PTC Eightfold Autofill Extension: Built a Manifest V3 Chrome extension that auto-fills job application forms, dropdowns, and file uploads from saved or JSON-imported candidate data.
- Event Management System: Developed a REST API and CLI (Python, FastAPI, SQLAlchemy, SQLite) for events and registrations, with concurrency-safe booking to prevent overbooking.
- Budget Sheets: Designed Excel financial tracking sheets for corporate clients using formulas, lookups, pivot tables, and data validation to automate budgeting.

PROJECTS

IntraView AI (AI-Based Interview System) | Final Year Project Sep 2025 – May 2026

Python, React, TypeScript, FastAPI, REST APIs, MongoDB, TensorFlow, Hugging Face, OpenCV, Docker

- Co-developed a full-stack interview platform (candidate + admin) with FastAPI, React, TypeScript, and MongoDB, including JWT authentication, role-based access, and OTP password reset.
- Built a 2.5M-question interview bank with difficulty controls and a real-time Gemini API fallback that generates questions on demand.
- Built real-time facial expression analysis (OpenCV, MediaPipe), a Docker sandbox for automated code grading, and an admin dashboard with live session monitoring.

Privacy Medical Chatbot Feb 2026 – Apr 2026

Python, Meta Llama 3.1 8B, LangChain, Hugging Face, Pinecone, RAG, NLP, Flask, AWS EC2

- Deployed Meta Llama 3.1 8B locally with 4-bit quantization (~4.58 GB), ensuring full medical data privacy with zero third-party API dependency.
- Built a RAG pipeline with LangChain, MiniLM-L6-v2 embeddings, and Pinecone, using a grounding prompt that reduces hallucinations and cites sources; top-2 retrieval in under 1 second and 2-5 second responses for concurrent users.

AI Face Shape Detector & Stylist Sep 2025 – Dec 2025

Python, TensorFlow, EfficientNetV2, CNN, OpenCV, MediaPipe, DeepFace, FastAPI

- Trained an EfficientNetV2 classifier with 2-stage transfer learning, improving validation accuracy from 60% to 83.4%, and combined it with MediaPipe's 478-point landmarks.
- Integrated DeepFace for gender detection and served personalized style recommendations via FastAPI, with live webcam and file upload.

EDUCATION

COMSATS University Islamabad | Pakistan Sep 2022 – Jun 2026

BS Computer Science

CERTIFICATIONS

Data Science & Analytics | HP LIFE | 2026

AI for All Backgrounds & AI Automation | Innovista | 2026

Generative AI with Large Language Models | DeepLearning.AI & AWS | Coursera 2025

ACTIVITIES

- Served as Registration Club Co-Lead for ACM COMSATS, coordinating student registrations for academic and tech events.
- Organized and managed events, including VisioSpark Episode 20 and Student Week.
